THREAT BLOCKR® | INTEL 471

Smart, Simple, Scalable. Everywhere.

Cybercriminals are continuously launching new attacks against organizations across the globe.

Too often countering the threat of malware is reactive and limited to single point-in-time analysis. These analyses can become irrelevant as the adversary adapts and recalibrates to circumvent protection measures and avoid detection. Internal visibility is no longer enough to stay a step ahead of the adversary. Continuous monitoring and coverage of the adversary, their turf and their tools are a necessity. Without this external visibility, organizations are ill-equipped to deploy a proactive and intelligence led cyber security strategy.

Benefits

- ✓ Better protect your network from threat actors and malware activity.

- ✓ Intel 471 Malware Intelligence automatically updated in ThreatBlockr platform ensuring protection is always current.

- ✓ Easy and fast deployment via ThreatBlockr Cyber Intelligence Marketplace.

Intel 471 Malware Intelligence

Intel 471's unparalleled global intelligence capability consists of automated collection systems and human intelligence teams that sit across 14 countries to provide near real-time coverage of threat actors and malware activity.

Intel 471's Malware Feed consists of Malware IP Indicators possessing high confidence, timely and rich context curated from Intel 471's industry leading access in the cybercriminal underground. Types of malware covered are banking trojans, infostealers, loaders, spambots, and ransomware.

About Intel 471

Intel 471 is the premier provider of cybercrime intelligence for leading intelligence, security, and fraud teams. Our adversary intelligence is focused on infiltrating and maintaining access to closed sources where threat actors collaborate, communicate, and plan cyber-attacks. Our malware intelligence leverages our adversary intelligence and underground capabilities to provide timely data and context on malware and adversary infrastructure. Our pedigree is unmatched – built on experience from operating in the intelligence services, military, law-enforcement and private companies across the globe.
